

Scalability & Future Plan

Date	1 October 2026
Team ID	6ab296c9dbd693aad5a6021
Project Name	FARM MANAGEMENT SYSTEM
Maximum Marks	1 Mark

Scalability & Future Plan:

This document outlines how the Farm Management System can scale to support more farmers, farms, crop records, and agricultural activities. It describes current limitations, planned improvements, and future enhancements for reliable and secure farm operations.

Current System Limitations:

S.No	Limitation	Impact	Priority to Address (High / Medium / Low)
1	Limited number of farmer and farm records	Slower handling as records increase	High
2	Manual tracking of crops, inventory, and activities	More time and risk of data errors	High
3	Basic reporting and access control	Limited insights and data protection	Medium

Scalability Plan:

S.No	Scalability Aspect	Current State	Proposed Upgrade / Solution
1	User Load	Supports a small number of users	Add capacity for more farmers and staff with scalable hosting
2	Data Storage	Stores basic farm records	Use an organized database with backup and growth capacity
3	Performance	Basic record retrieval and reports	Optimize queries and add caching for faster access
4	Security	Basic login and permissions	Add role-based access, secure authentication, and regular backups

Future Roadmap:

Phase	Planned Feature / Enhancement	Target Timeline	Expected Impact
Phase 1	Farmer, farm, and crop profile improvements	1–2 months	More complete and organized records
Phase 2	Inventory and task scheduling	3–4 months	Better tracking of supplies and farm activities
Phase 3	Dashboard, alerts, and reports	5–6 months	Faster decisions using timely farm insights
Phase 4	Mobile access, weather integration, and expanded security	7–9 months	Easier field access and more resilient operations
