

Solution Requirements

Date	01 October 2026
Team ID	6ab296c9dbd693aad5a6021
Project Name	FARM MANAGEMENT SYSTEM
Maximum Marks	4 Marks

Define Functional and Non-Functional Requirements:

Create a comprehensive list of requirements to define exactly what your solution will do and how well it will perform.

- **Functional Requirements (FR)** define specific behaviors, functions, or features of the system (What the system should do).
- **Non-Functional Requirements (NFR)** specify the criteria that judge the operation of a system, rather than specific behaviors (How the system should be).

Fill out the descriptions and necessary details for each category provided below.

Step 1: Functional Requirements (FR)

S.No	Requirement Category	Requirement Description	Priority (High/Medium/Low)
1	Farmer Registration & Login	[Farmers will be able to register, login and manage their profile.]	High
2	Crop Management	[Farmers can add, edit and view crop details and farming details.]	High
3	Field / Land Management	[Manage land details, area, soil type, irrigation and location.]	High
4	Daily Activities & Tasks	[Track daily activities like sowing, watering, fertilizing, harvesting, etc.]	Medium
5	Inventory Management	[Manage seeds, fertilizers, pesticides, equipment and their stock levels.]	Medium

S.No	Requirement Category	Requirement Description	Priority (High/Medium/Low)
6	Market Information	[View current market prices for crops, find buyers and sell produce.]	Medium
7	Weather Updates	[Get latest weather forecast and alerts for the farmer's location.]	Medium
8	Reports & Analysis	[Generate reports for crop yield, expenses, profit and overall farm progress.]	Low

Step 2: Non-Functional Requirements (NFR)

S.No	NFR Category	Requirement Description	Target Metric / Acceptance Criteria
1	Performance & Speed	[System should respond within 2 seconds for normal operations.]	Page load time < 2 sec
2	Scalability	[Support multiple users and can handle growth in data and users.]	Up to 1000 concurrent users
3	Security & Data Privacy	[Protect farmer data and ensure secure login and transactions.]	Data encrypted, role-based access, regular backups
4	Reliability & Availability	[System should be available 99% of the time and work without major downtime.]	Uptime 99% (24/7 availability)
5	Usability & Accessibility	[Simple and easy to use for farmers with basic digital knowledge.]	Complies with WCAG 2.1 AA standards
6	Other	[Add any additional non-functional requirements here]	Mobile responsive, multi-language support (Tamil/English)
